*Acknowledgement*

Receipt is acknowledged of the Amendment filed April 5, 2005.

*Reasons for Allowance*

Claims 7, 8, and 10-17 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Adusumilli, taken alone or in combination of other references, does not teach or fairly suggest a semiconductor integrated circuit comprising, among other things, a selector comprising a second input terminal connected to the stage on the input side through the flip-flop circuit, as set forth in the claim 7; a pulse generator configured to generate pulse signals synchronous to the clock signal in the divided mode, and in the through mode, stop the generation of the pulse signals and keep the storage circuit passing the signal therethrough, and the flip-flop circuit latches and holds the signal in synchronization with the pulse signals, as set forth in the claim 8; the plurality of function modules operate in synchronization with the clock signal, as set forth in the claim 10; the supply of the clock signals to the function modules stops in the through mode, as set forth in the claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
